

Donning PPE – full/contact

If you are in the RED zone or within 1.5m of a resident

Hand hygiene

Gown

or

N95 Mask

or

or

Eye protection

or

Gloves

= GMEG

For example;

- All staff directly involved in resident arrivals
- Clinical staff providing direct patient care
- All staff involved in resident transfers to the hospital
- The clinician performing viral screening (also always double glove and wear a face shield)
- The clinician taking the resident's temperatures during the health checks
- Cleaning staff in the red zone or when cleaning a room in an orange zone which requires a high clean
